

ShiShi

Experimental electronic artist - Ljubljana, Slovenia

/// BIOGRAPHY

Dark sound as a space for thought.

ShiShi is a Ljubljana-based experimental electronic artist crafting dark, cinematic soundscapes at the crossroads of ambient, industrial, and trip-hop. Influenced by Lorn, Arca, Aphex Twin, and Bjork, ShiShi moves between minimal and dense, fragile and abrasive. With a background in philosophy, sound becomes a space where logic and intuition meet - focused on atmosphere and texture rather than traditional song structures. Debut EP Blood Tape (2025) was reviewed by five international publications.
